The washbeam for  
impressively bright, color intensive  
and homogeneous beams!

...JUST BRILLIANT

# Sparx 12: The perfect pixel washer when you need a little more!

The Sparx 12 Washbeam is impressive in every respect, whether as an effects unit with TwinZoom and single pixel control for backlighting applications or as an excellent wash light with perfectly homogeneous beams over the entire zoom range of 2.2°–60°.

Its 19 x 40 Watt LED output provides impressive brightness. This impressively outshines conventional 2 kW spotlights in particularly intensive colour applications, even though the Sparx 12 is one of the most absolutely lightest units with a height of 49 cm and a weight of just 15.5 kg. Of course, the Sparx 12 also works extremely quietly thanks to special heat pipe cooling, a feature that we've attached great importance to for years in all of our new developments. The optical system of the Sparx12 guarantees perfectly homogeneous illumination and diverse multicolour applications with intensity, brilliance and speed that are sure to be fun and entertaining.

## Sparx 12 – the compact wash beam:

- Patented TwinZoom from 2.2°–60° (1:27.3)
- Scattered light-optimised, homogeneous beam
- Individual LED single pixel control
- Sparkle channel for dynamic effects
- Overlay of multiple layers with independent patterns
- Optimised color mixing behaviour
- High-resolution, stepless and color-accurate dimming from 0–100%
- Ultra-quiet 29 dB(A)
- Flicker-free operation, camera mode up to 600 Hz
- Electronic strobe with pulse and random effects
- Separate CTC channel
- Basic colour temperature can be selected:

2700 K

3200 K

4200 K

5600 K

6000 K

6500 K

7000 K

8000 K
