The do's and don'ts of network design for AVoIP

Johan Hoel Senior VAR & ProAV Account Manager

A seminar for AV professionals about the challenges of network design. The ever-changing landscape in PRO AV in regards of protocols and standards can be a challenge even for the most tech savvy person. And in the heart of nearly all future AV installations there will be a network switch.

Is it really that hard?

In this seminar we will iron out some of the more common misunderstandings about network integration in the PRO AV segment.
