

Introducing Control Buddy for PIXERA

You are in Control
Complexity made simple

CONTROL BUDDY™

Introducing Control Buddy for PIXERA

Control Buddy is proud to integrate with PIXERA, offering a seamless and powerful control solution for your projects. Through its innovative engine, Control Buddy communicates directly with PIXERA's JSON RPC API using TCP sockets. By utilizing a subset of PIXERA's API, Control Buddy allows you to control timelines and access vital information with ease.

Whether you're managing complex shows or simple operations, Control Buddy for PIXERA ensures efficiency, reliability, and user-friendly functionality. It's designed to enhance your workflow by simplifying intricate processes, giving you complete control at your fingertips.

Experience the difference with Control Buddy for PIXERA, and redefine how you manage your media server projects.
